

Frazer Public School - Addition & Remodel

Total Cost
\$4,478,066

Area:
22,408 s.f.

Client:
Valley County School
District No. 2, 2B

Completion:
April 2007

Location:
Frazer, MT

This project involved two major additions to the existing school. Four high school class rooms were added on the high school site, which included an FCS suite and a new chemistry lab.

At the elementary wing, two elementary classrooms were added, along with all school music and art rooms, and new locker rooms. Additional remodeling (increased seating capacity) to the existing gymnasium was also in the scope of work.

The new project utilized ground source heat pumps for energy efficiency.
